㉓ Improvement in attenuated total reflection spectroscopy.

㉔ Method of ATR spectroscopy and substrate  
probe for use therein. The probe comprises a single  
optical fibre sensor, a bundle of such sensors, the  
sensing zone of each sensor being a small diameter

cylindrical portion merging at least on the side of the  
light intake end into a frustoconical portion whose  
large diameter base is turned away from said small  
diameter cylindrical portion.
